Cannot access photo library on iPad or iPhone

If FotoWeb for iPhone or iPad does not allow you to access the pictures in your camera roll, you need to enable location services for the FotoWeb app on your iOS device.

Resolution

1) Open the Settings from the Home screen on your device.

2) Go to Privacy in the left panel.

3) Make sure Location services are enabled and that they are also enabled for FotoWeb Desktop specifically.

4) Restart the FotoWeb Desktop app.
